

# PANASONIC UNIFIED COMMUNICATIONS MOBILITY SOLUTIONS

**Panasonic**

FEATURES	MOBILE EXTENSION	MOBILE SIP EXTENSION	MOBILE DESK – IP SOFTPHONE/DESKPHONE	CA RCS
How it Works	For customers that want to utilize single number reach, calls can simultaneously ring both the cell phone and desk phone when away from the office.	For customers that want to utilize single number reach, calls can simultaneously ring the cell phone via a SIP client and desk phone using the same extension number.	For remote customers that want to utilize a computer-based IP softphone or traditional desk phone connected to a primary phone system located at another site.	For customers that want to utilize a cell phone and require full-presence to the primary phone system located at another site.
